UTC Project Information	
Project Title	Developing a Transportation, Emissions and Health Data Hub
University	TTI, JHU, GT, UTEP, UCR
Principal Investigator	Andrew Birt
PI Contact Information	a-birt@tti.tamu.edu
Funding Source(s) and Amounts Provided (by each agency or organization)	CAR-TEEH (Federal): Match (Non-Federal):
Total Project Cost	$
Agency ID or Contract Number	Grant Number: 69A3551747128
Start and End Dates	May 2017 – October 2018
Brief Description of Research Project	This project involves the development of a web based data hub designed to organize, share and link data relevant to transportation emissions and human health. The data-hub will be designed to organize and share data among collaborators in the Center for Advancing Research in Transportation Emissions, Energy and Health (CAR-TEEH). The project involves research into specific characteristics of transportation and health data, and developing a platform to house datasets and link to relevant information related to transportation emissions and public health data. The data hubs long-term goal is for it to be continually used by researchers to upload and organize data, thereby increasing its availability and value to transportation and human health research.
